

Project Development Phase – Sprint 3

REPORT

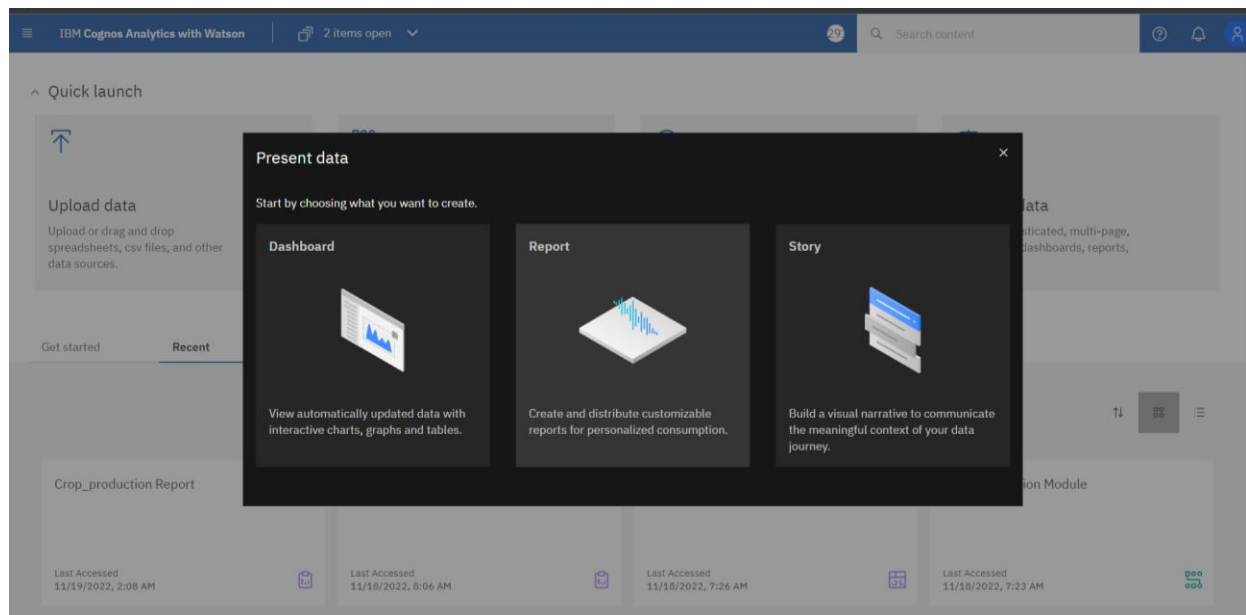

Date	12 November 2022
Team ID	PNT2022TMID23966
Project Name	Estimate The Crop Yield Using Data Analytics

Report:

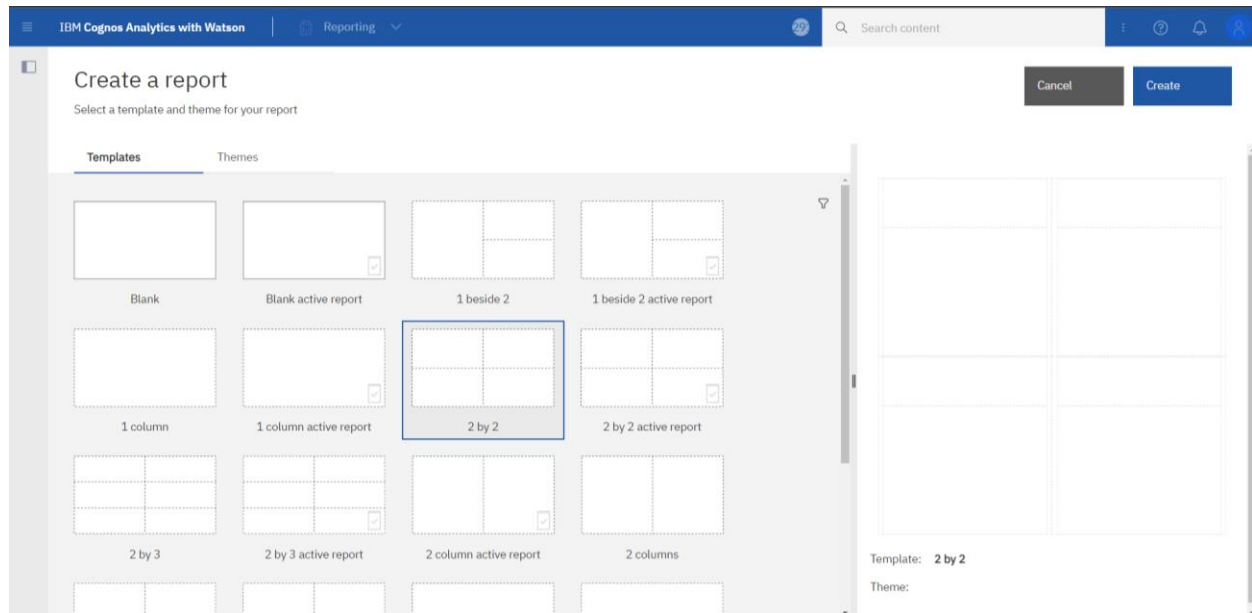

A report is type of business report in which you present quantitative and qualitative data to evaluate your strategies and performance. Based on this data, you give recommendations for steps and business decisions while using the data as evidence that backs up your evaluation. It is also an end to end data visualization capabilities to applications but with a more detailed manner.

Generating Report:

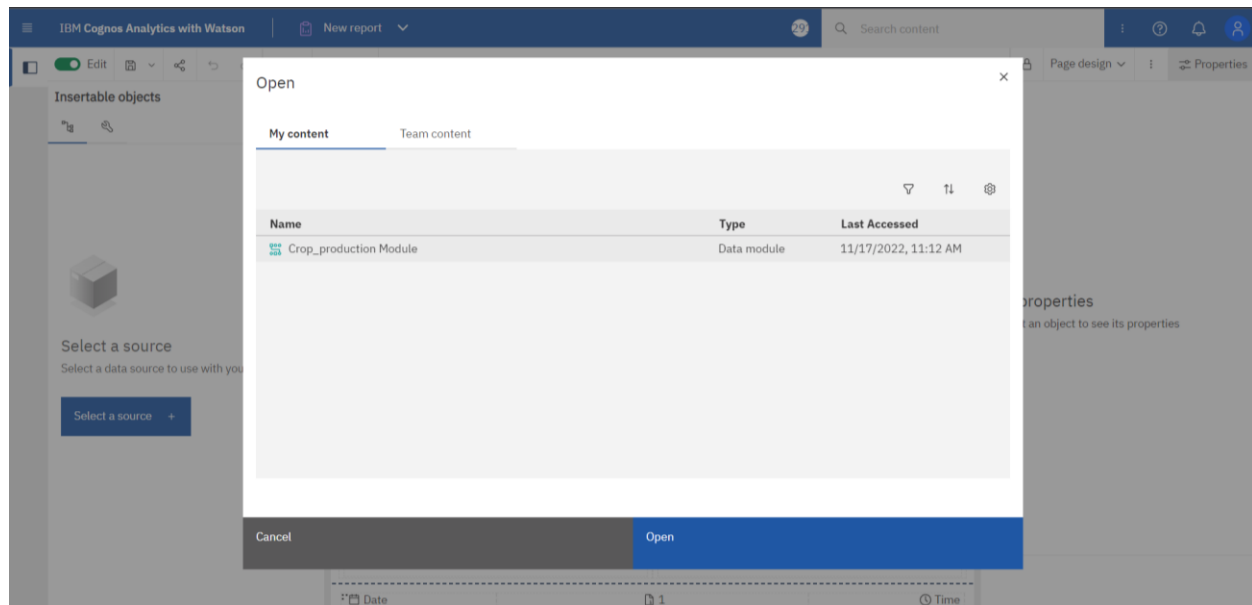

Step 1: Click present the data option and choose report.

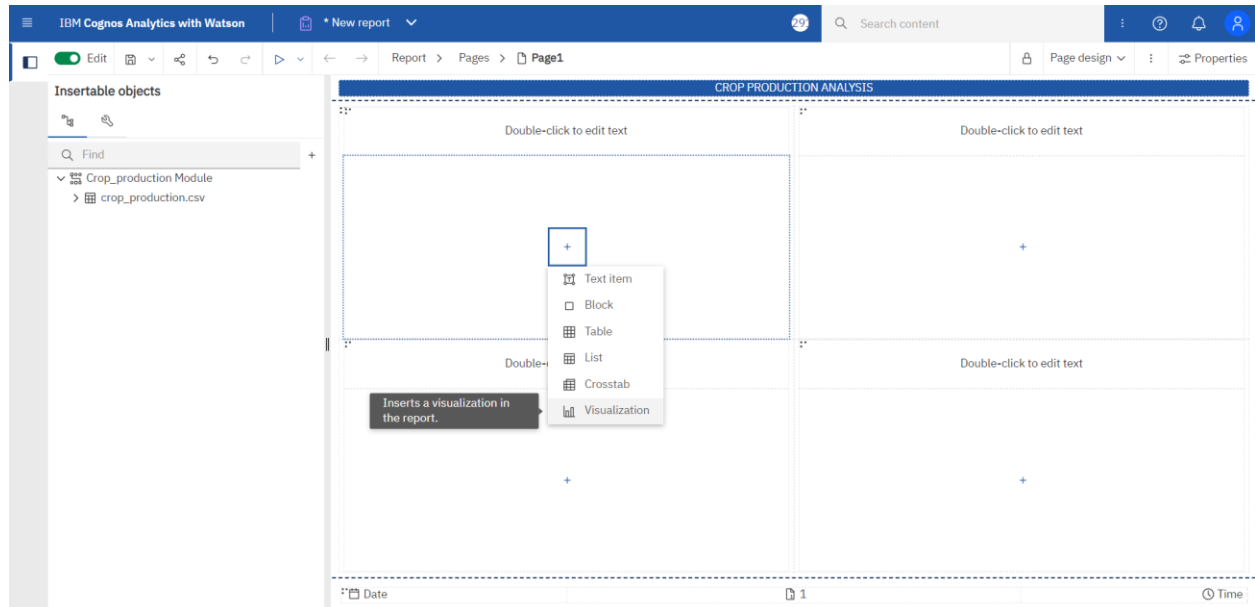

Step 2: Choose the required template and theme and click create.

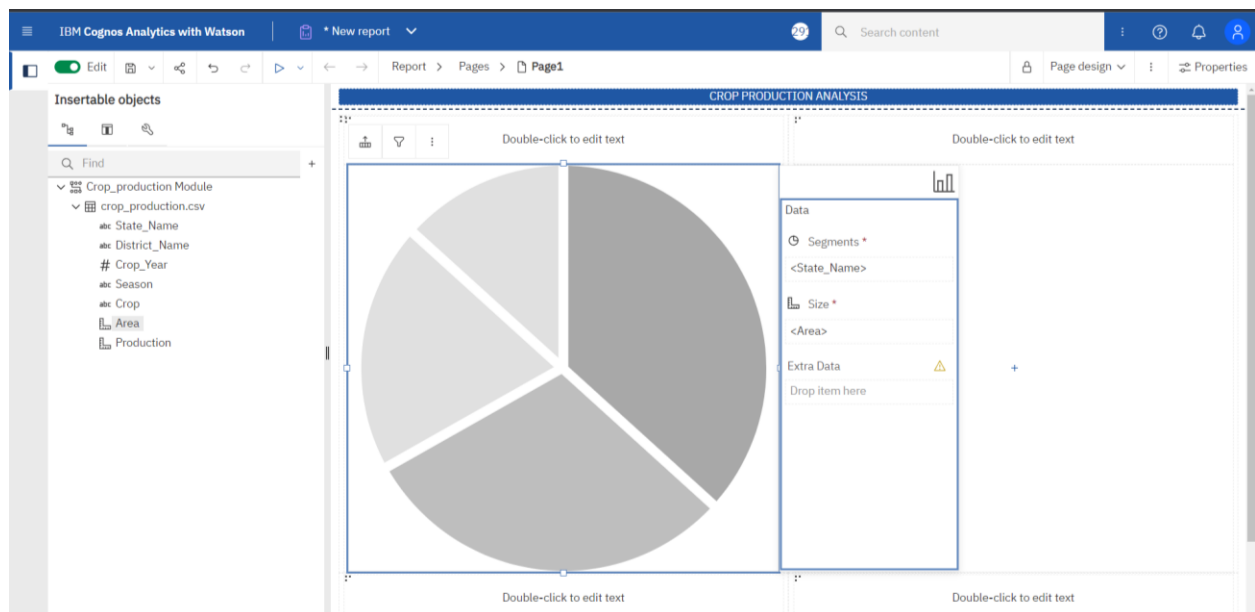

Step 3: upload the data module via select a source option.

Step 4: After the template is loaded click the add option to add the required visualization and customize the title as per our need.

Step 5: Add the suitable item in the required segment for virtualization to load.

Step 6: After all the virtualizations are created, the report is created.
