

Project Development Phase – Sprint 3

STORY

Date	12 November 2022
Team ID	PNT2022TMID23966
Project Name	Estimate The Crop Yield Using Data Analytics

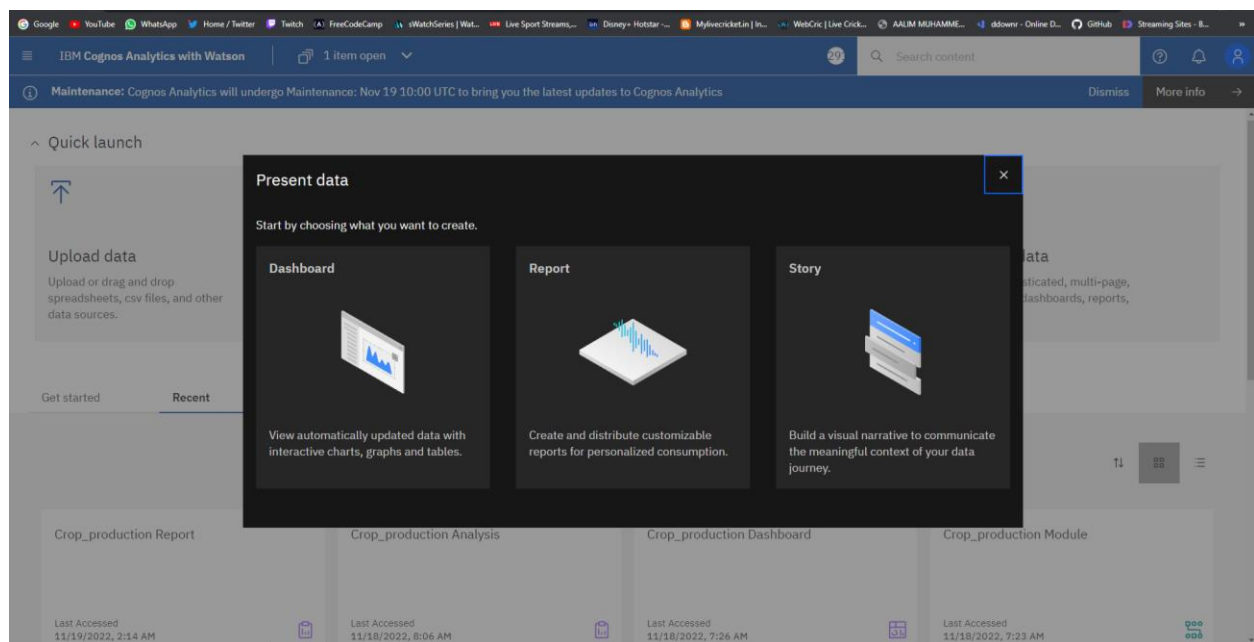

STORY:

Story in IBM cognos enables us to represent the summary of the analysis of the given dataset through slideshow presentation.

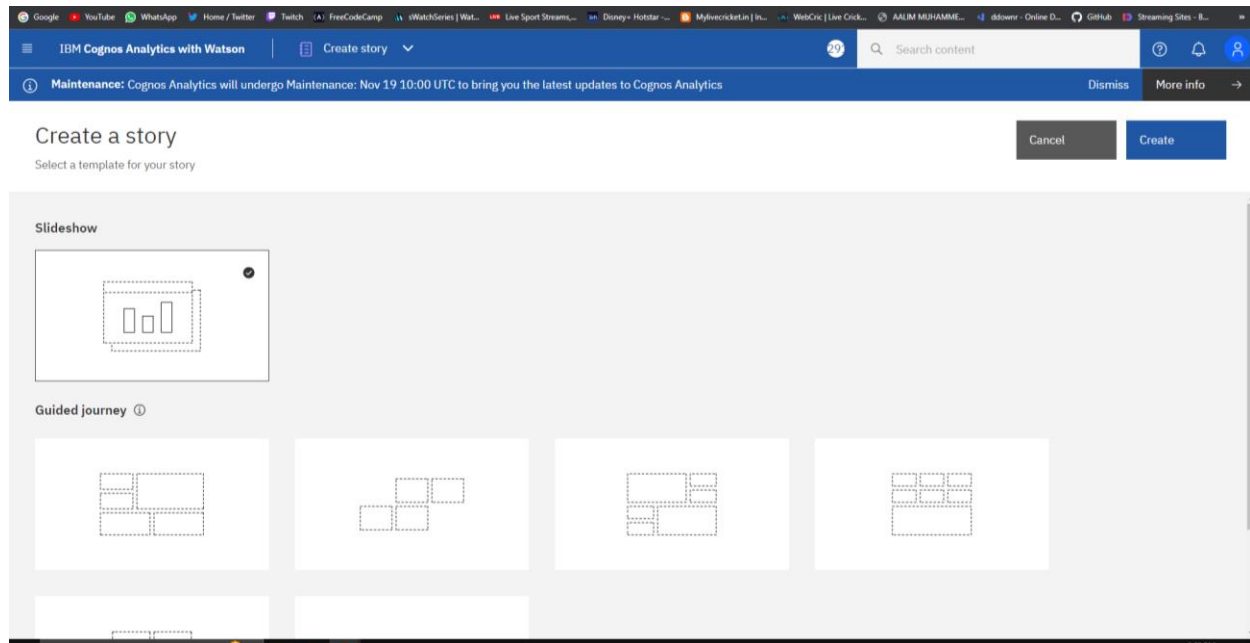

This helps us to understand the analysis observed through visualizations more easily and quickly.

Creation of Story

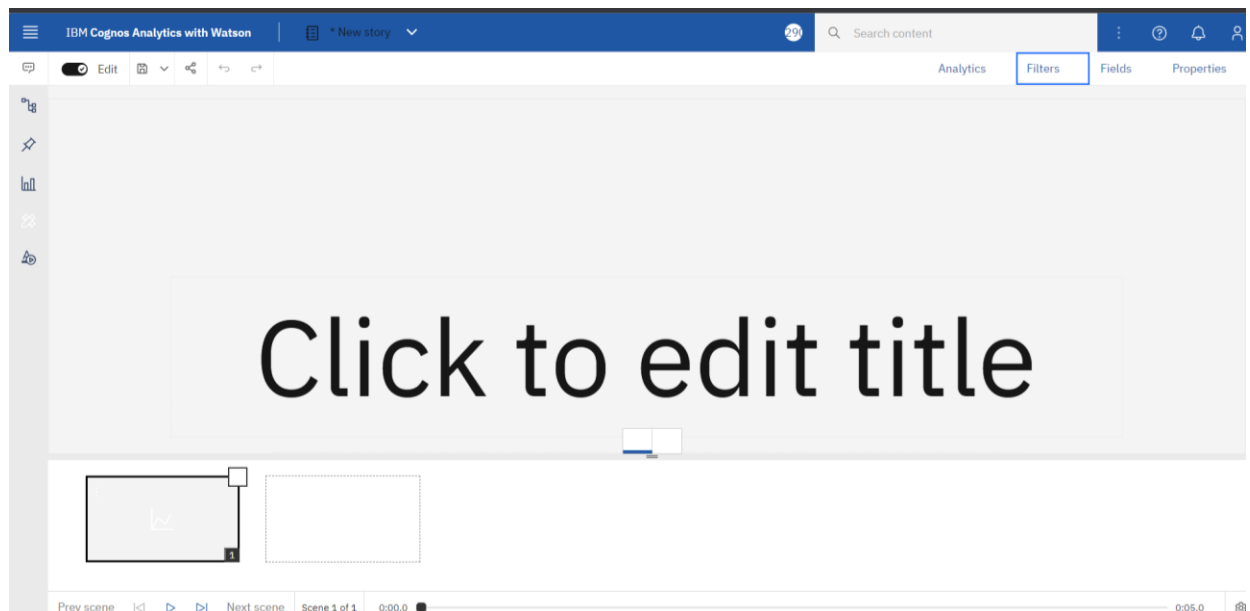

Step 1: Choose story as way to present data

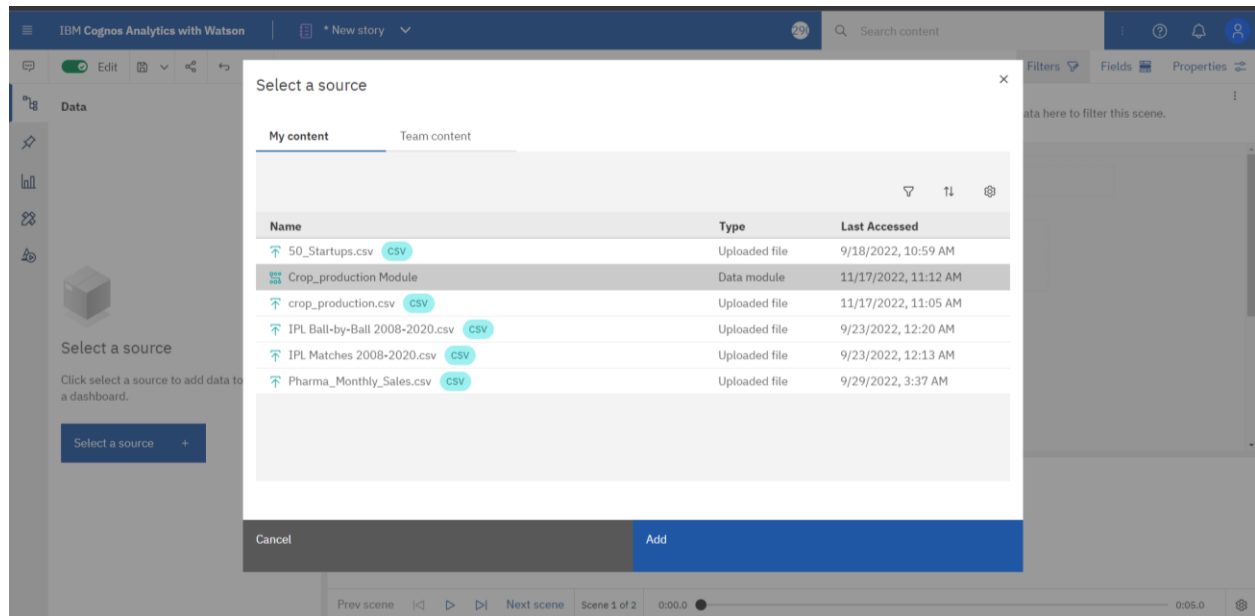

Step 2: Choose a template for the story

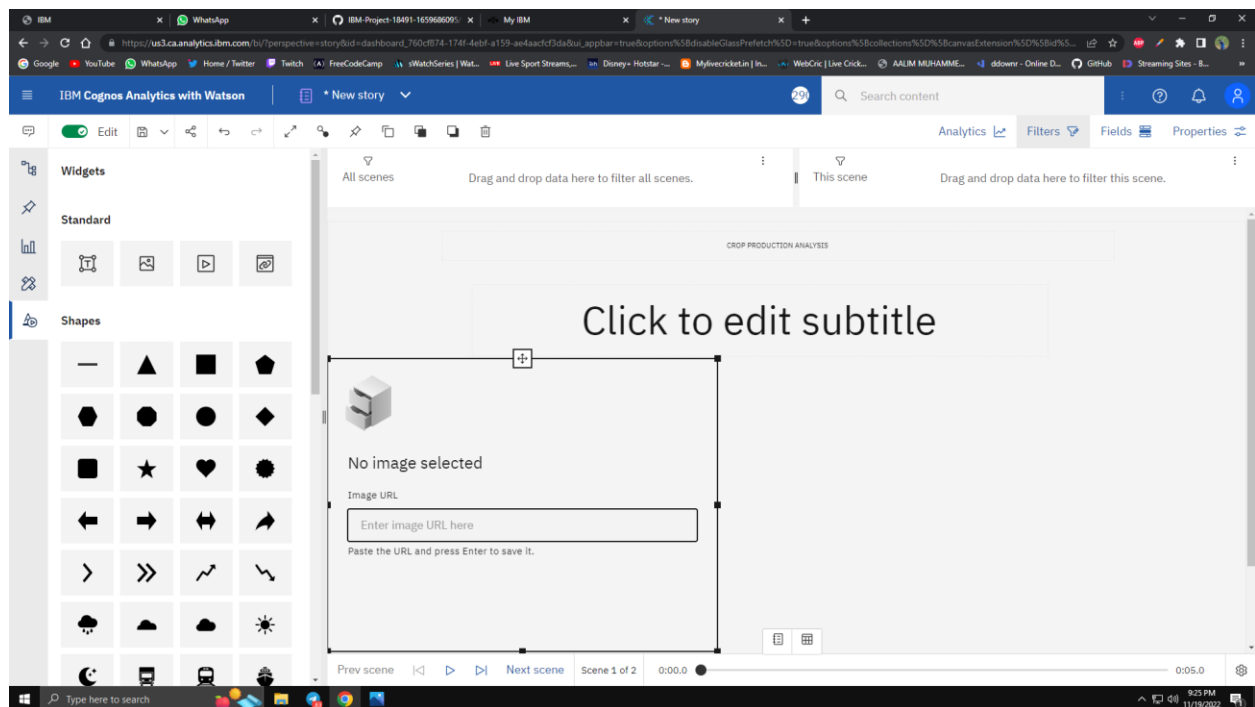

Step 3: Give title and details for the story page

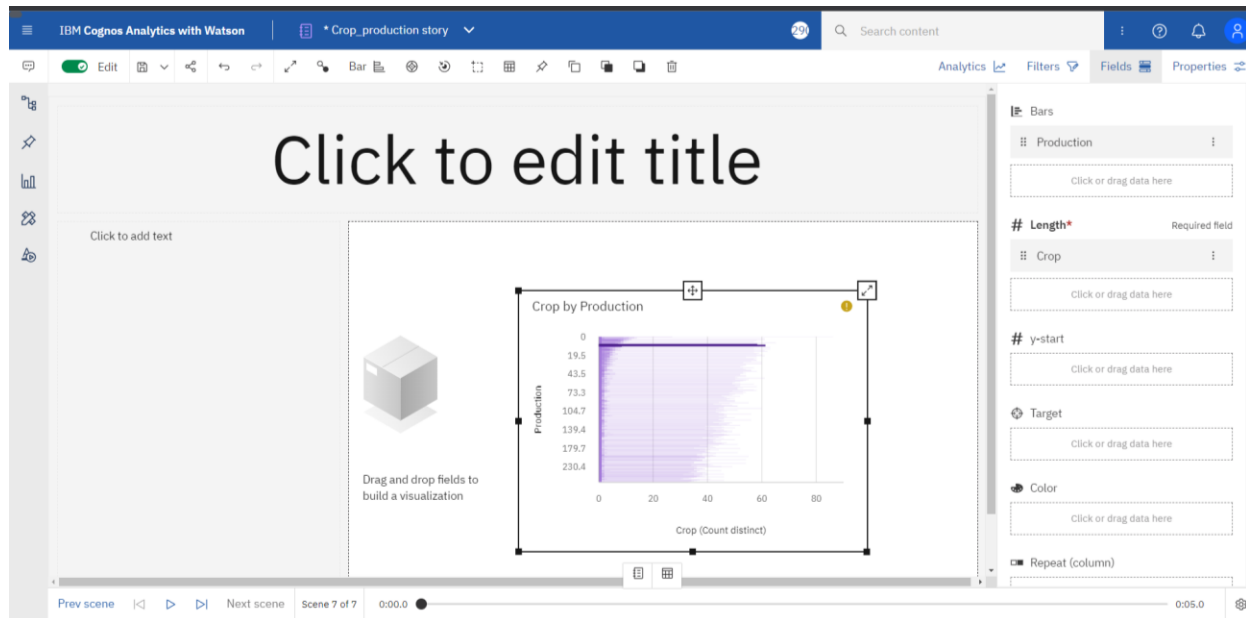

Step 4: upload the dataset (or module) via source

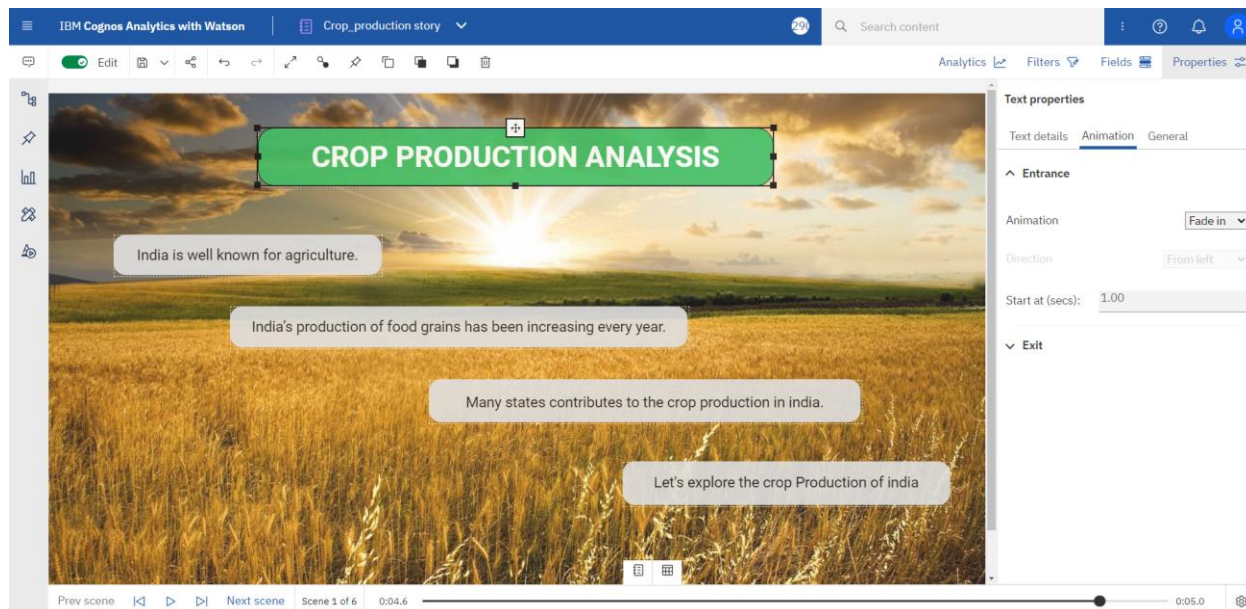

Step 5: Add images for the better design using widgets

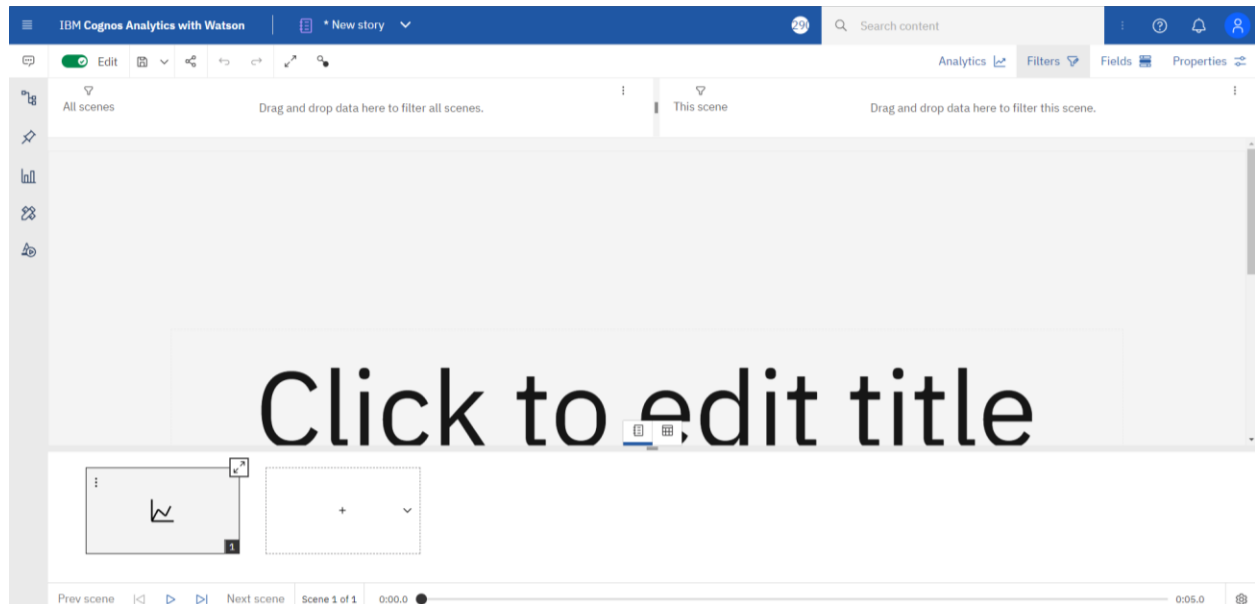

Step 6: Import visualizations using widgets too.

Step 7: customize Animation effects through properties.

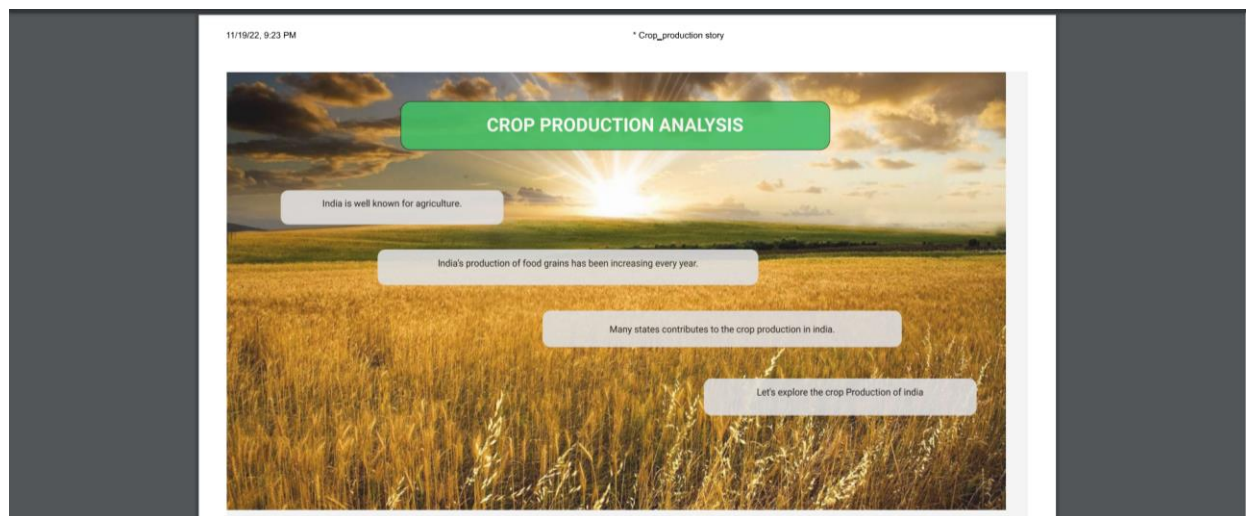

Step 8: Add many slides using add slides button present in bottom.

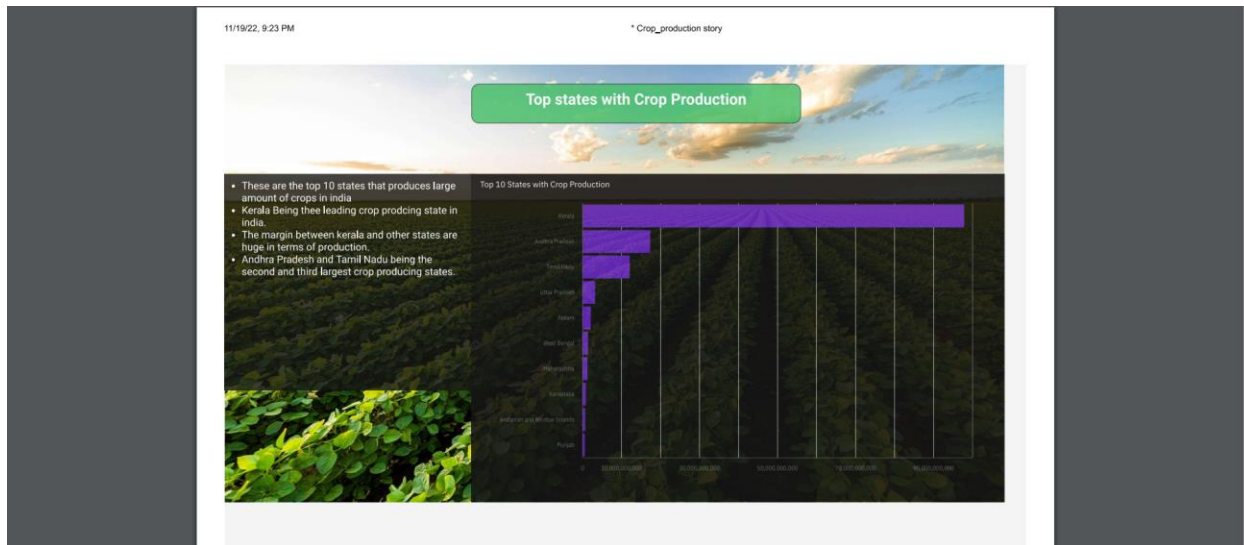

After the desired customizations, story is created.
