

I am Farmer  
from my  
village with  
acres of lands.

I am trying  
to yield  
crops in my  
land.

But my crops  
yielding are  
not efficient  
and profitable.

Because of  
unforeseen climate  
changes and  
bacteria infection  
leads to spoilage  
of crops.

It makes me  
frustrated and  
angry, while  
being  
disappointed  
and sad.
